

## STORIES FROM THE FIELD

# Boosting local businesses and Bringing peace among clans in Manienna

After decades of conflict, ITSCI brings peace among clans in Maniema Province

In the Pangi territory, the benefits of the ITSCI programme have transformed a decades-long local conflict. Since 1975, the Nbizu, Ngozi and Kayeye clans have been in a protracted land dispute. The clans disagreed about the boundaries between each community's land in the forest surrounding their homes. The stakes were high because the land has ancestral significance and the clans struggled to trace and differentiate between their minerals, exacerbating the conflict.

However, since 2013, the clans have gradually been integrated into the ITSCI programme.

**Mr. Musa Museme Djogoo, president of the COMINZI cooperative in Nbizu**

ITSCI tags have provided the communities with tools to resolve disputes over land and mining taking place within the forests. By requiring consistent, ongoing monitored statistics for each site, ITSCI has enabled the clans to distinguish between their respective production.

### ITSCI Programme Supporting responsible mineral production

NOVEMBER 2019

ITSCI was developed and is managed by the global not-for-profit tin and tantalum industry associations ITA and T.I.C. as an inclusive, sustainable, multi-stakeholder programme. We assist all actors in implementing due diligence to create responsible 3T mineral supply chains and benefit from trade, even from high risk areas and our standards are 100% aligned with the OECD guidance. ITSCI has a track record of global co-operation and achievement contributing to capacity building, better governance, human rights and stability through monitoring more than 1,500 mine sites in Burundi, DRC, Rwanda and Uganda, and protecting the livelihood of tens of thousands of miners plus their communities.

The field activities of ITSCI are implemented through Pact Inc. See more news and information on <http://itsci.org>

Participation in the ITSCI programme has resulted in considerable benefits to each community.

Mr. Mussa Museme Djogoo, President of the COMINZI cooperative in Nbizu, which includes around 80 artisanal miners, praised ITSCI's impact in Manienma.

**“ The growth of the 3T mining sector has boosted small economic activities of the residents. ”**

Mr. Corneille Malungu, President of the COMELIE cooperative

COMINGOZI, the cooperative representing the Ngozi clan, has reinvested in the community part of the increased profit it has experienced because of ITSCI. The cooperative is constructing a school in Kizigaziga village, and revenue from artisanal mining has paid for needed sheet metal.

The COMELIE cooperative, based in Kayeye, has a membership of over 60 miners. Its President, Mr. Corneille Malungu, has noticed increase efficiency and profitability for the artisanal mining sector in Kayeye. Mr. Malungu noted that because participation in the ITSCI system facilitates relationships between processors that finance production and miners in the cooperative, the community as a whole benefits.
